PHYSICALLY FIT AT ANY AGE

It isn't age, it's careless living that puts men down and out. Keep your internal organs in good condition and you will always be physically fit. Watch the kidneys.

The kidneys are the most overworked organs in the human body. When they break down under the strain and the deadly uric acid accumulates and crystallizes, look out! These sharp crystals tear and scratch the delicate urinary channels causing excruciating pain and set up irritations which may cause premature degeneration and often do turn into deadly Bright's Disease.

One of the first warnings of sluggish kidney action is pain or stiffness in the small of the back, high colored or scanty urine, loss of appetite, indigestion or rheumatism.

Do not wait until the danger is upon you. At the first indication of trouble so after the cause at once. Go to your druggist immediately. SYRUP OF FIGS FOR CROSS, SICK FEVERISH CHILD

If little stomach is sour, liver torpid or bowels clogged.

Mothers can rest easy after giving "California Syrup of Figs," because in a few hours all the clogged-up waste, sour bile and fermenting food gently moves out of the bowels, and you have a well, playful child again. Children simply will not take the time from play to empty their bowels, and they become tightly packed, liver gets sluggish and stomach disordered.

When cross, feverish, restless, see if tongue is coated, then give this delicious "fruit laxative." Children love it, and it can't cause injury. No difference what ails your little one—if full of cold, or a sore throat, diarrhoea, stomachache, bad breath, remember, gentle "inside cleansing" should always be the first treatment given. Full directions for babies, children of all ages and grown-ups are printed on each bottle.

Beware of counterfeit fig syrups. Ask your druggist for a 60-cent bottle of "California Syrup of Figs," then look carefully and see that it is made by the "California Fig Syrup Company." We make no smaller size. Hand back with contempt any other fig syrup.—Adv.

WHEN YOU WAKE UP DRINK GLASS OF HOT WATER

Wash the poisons and toxins from system before putting more food into stomach.

Says inside-bathing makes any one look and feel clean, sweet and refreshed.

Wash yourself on the inside before breakfast like you do on the outside. This is vastly more important because the skin pores do not absorb impurities into the blood, causing illness, while the bowel pores do.

For every ounce of food and drink taken into the stomach, nearly an ounce of waste material must be carried out of the body. If this waste material is not eliminated day by day it quickly ferments and generates poisons, gases and toxins which are absorbed or sucked into the blood stream, through the lymph ducts which should suck only nourishment to sustain the body.

A splendid health measure is to drink, before breakfast each day, a glass of real hot water with a teaspoonful of limestone phosphate in it, which is a harmless way to wash these poisons, gases and toxins from the stomach, liver, kidneys and bowels; thus cleansing, sweetening and freshening the entire alimentary canal before putting more food into the stomach.

A quarter pound of limestone phosphate costs but very little at the drug store but is sufficient to make anyone an enthusiast on inside-bathing. Men and women who are accustomed to wake up with a dull, aching head or have furred tongue, bad taste, nasty breath, sallow complexion, others who have bilious attacks, acid stomach or constipation are assured of pronounced improvement in both health and appearance shortly.—Adv.

The Farmer Receives More Than Five Thousand Dollars a Minute From Swift & Company

This amount is paid to the farmer for live stock, by Swift & Company alone, during the trading hours of every business day.

All this money is paid to the farmer through the open market in competition with large and small packers, shippers, speculators and dealers.

The farmer, feeder, or shipper receives every cent of this money (\$300,000 an hour, nearly \$2,000,000 a day, \$11,500,000 a week) in cash, on the spot, as soon as the stock he has just sold is weighed up.

Some of the money paid to the farmer during a single day comes back to the company in a month from sale of products; much does not come back for sixty or ninety days or more. But the next day Swift & Company, to meet the demands made by its customers, must pay out another \$2,000,000 or so, and at the present high price levels keeps over \$250,000,000 continuously tied up in goods on the way to market and in bills owed to the company.

This gives an idea of the volume of the Swift & Company business, and the requirements of financing it. Only by doing a large business can this company turn live stock into meat and by-products at the lowest possible cost, prevent waste, operate refrigerator cars, distribute to retailers in all parts of the country—and be recompensed with a profit of only a fraction of a cent a pound—a profit too small to have any noticeable effect on the price of meat or live stock.
